Troy, New York  
August 2011

## ACKNOWLEDGMENT

I thank Prof. E Fred Schubert for introducing me to research in light emitting diodes. He has been immensely helpful with his wide and in-depth knowledge in the field and as a constant source of motivation. I consider myself fortunate to be able to work in his research group.

I would also like to thank Prof. James Lu, Prof. Peter D. Persans, Prof. Kim Lewis for serving as members of my doctoral committee.

I thank Dr. Frank Mont for spending his valuable time training me and I enjoyed working with him. Dr. Jaehee Cho has been a constant source of guidance.

I am grateful for the valuable discussions and support from the former and current group members of Future Chips Constellation (FCC): Dr. Jong Kyu, Kim, Dr. Min-Ho Kim, Dr. Martin Schubert, Dr. Jingqun Xi, Dr. Yangang Xi, Dr. Hong Luo, Dr. Kaixuan Chen, Xiaolu Li, Wonseok Lee, Dr. Sameer Chhajed, Dr. Roya Mirhosseini, Dr. Di Zhu, Dr. Qi Dai, Dr. Jiuru Xu, David Poxson, Qifeng Shan, Guan-Bo Lin, An Mao, David Meyaard, Ming Ma, Xing Yan and Jing Wang. I would like to thank John Schatz for his expert technical assistance and Gina Moore for her friendly and timely assistance.

I am also grateful for the help and guidance from the staff of Micro and Nano Fabrication Clean Room (MNCR) at RPI: David King, David Frey, Bryant Colwill and Kent Way.

Without my friends, I would not have had so much fun in these five years in Troy. I thank Arun, Adarsh, Divya, Swati, Vibha and Sthuthi for all the jolly times we spent and for the emotional support at times of need.

Last but not the least, I would like to thank my family, without the love and support of whom I would not have been what I am today.
